

## Key Stage 2

All children in the fourth year sat the national tests in the three core subjects English, Mathematics and Science.

This year the children achieved results far beyond the standards set in previous years demonstrating they all have a sound knowledge in the basic subjects and in the majority of cases, well above the national average.

In English 100% achieved level 4 and 76% reached level 5.

In Maths 90% achieved level 4 and 50% reached level 5.

In Science 100% achieved level 4 and 72% reached level 5.

This is all the more commendable since our main focus at Vinehall is on Common Entrance and Scholarship Examination taken two years later.

The week of testing was indeed seen to be fun rather than a burden!
