

## French

The academic year was heralded by the first interactive whiteboard in the department as well as a brand new course for Years 5 - 8 including a course book for the scholars as well. The introduction of this course has meant that a clear progression of work can now be seen from year to year. Schemes of work, overall views and a comprehensive development plan have all been prepared.

A major highlight of the year was the Year 7 French Trip to Château de la Baudonnière in Normandy which was a resounding success, providing the pupils with plenty of challenges and opportunities to practice and learn French.

Another highlight was the Year 8 trip to Paris, an excellent cultural and gastronomic experience.

Certainly much has been achieved in the French department this year with academic results being highly pleasing too and the department is in a good position to move further forward and make good use of the interactive whiteboards for which software has already been acquired.
