

Year 8 pupils made electronic Christmas cards before the challenge of their final Art and Technology project, animating an Impressionist painting and Year 7 pupils each produced a piece of jewellery based on a seaside theme. The children had a wide range of ideas and constantly surprise us with their inventiveness.

Acrylic clocks in Year 6 and newspaper chairs in Year 5 were perennial favourites and successful as ever. There were also some imaginative ideas for the Year 6 cam models where a simple mechanism was used to animate the children's inventions. Year 4 have enjoyed making looms and managed to make Angel Delight to prove that gears really do make things go faster. Wood turning clubs continued to be oversubscribed but a lot of excellent work was produced and presented in assemblies.
